

**4/25/2024 London, UK.**

## **Charring Cross International Symposium, Main Stage, Theatre #1**

Professor Andrew Holden presented "A New EndoSuture System for Enhanced Endograft Fixation and Seal" to ~2,500 Endovascular Physicians in a jam-packed session. Prof. Holden highlighted "trans-adventitial suture fixation, pulling the graft to the aorta." The evolution of this technology, lead us to 14 successful clinical cases performed in Australia, Europe and N. America.

According to organizers, the 2024 Charring Cross International Symposium, was by far the best attended endovascular meeting ever produced.

Thank you, for your time and insights on the progress we are making with the VESTECK, Inc., "SUTURE-TIGHT"™ technology:
